

BEYOND THC

A Webinar Presentation

Presented by Gina Gault, Outreach Specialist, RISE

In this interesting presentation Gina will thoroughly explain the medicinal properties of the chemical compounds of cannabis, including terpenes, cannabinoids and how they change during the plant's life cycle. She will explore the history of the cannabis plant, how it is metabolized, and how to navigate a nation of strains scientifically.

Gina Gault is the Community Outreach Specialist for Rise Mundelein with a background in management and service. She has been a figure in the cannabis industry since 2017 when she joined the Illinois Women in Cannabis organization and later moved into a board member position. Gina transitioned into the corporate cannabis industry where she continues to work with leaders to provide education and outreach to her surrounding communities. She has studied the medicinal properties of cannabis to aid in the health of all and has found her way into the industry to walk beside people through their journey to wellness.

THURSDAY, MAY 20, 2021
