

MANAGEMENT OF COMMON MEDICAL CONDITIONS IN MIDDLE AND LATE-STAGE DEMENTIA

Presented by **Chris Petrik, RN, BS, Director of Education**
Elderwerks Educational Services

The more advanced the stage of dementia, the greater comorbid conditions are likely to exist. Worsening existing health problems can occur as a person living with dementia moves thru each stage of dementia. In this program we will discuss specific areas of concerns, such as pain, infection, incontinence, eating dysfunctions, and appropriate interventions for the caregiver.

WEDNESDAY, MAY 4, 2022
