### Conference highlights

On Wednesday 19th February, you and other future AHP members will discuss and vote on crucial topics in order to formally establish the African Hydrogen Partnership at its first Annual General Meeting, which will be announced at the end of the conference.

Thursday 20th February will be a day of presentations, exploring the first large-scale hydrogen, ammonia and fuel cell related activities and projects underway in Africa.

### Networking opportunities

We expect to welcome senior officials from African government and parastatal organizations as well as leaders of industrial companies and financial institutions. The AHP Preparation Meeting will provide an excellent networking opportunity to meet other stakeholders in the hydrogen economy with a focus on Africa.
