COST

\$800 Per

Person

Includes:

All Material &
Meals

Project Managers are the center-pin of every construction project. To the project team, they are the boss, the persons with the power and the answers. To company officers, they are the eyes, ears, and brain of the project - responsible for completing the work on time, according to specifications, and at a profit. To the project owner, general contractor and other trades on the job, they are the specialty contractor's ambassador, with authority to act on behalf of the company they represent. It's a job with many facets, a job that requires leadership, technical knowledge, sound judgement, common sense, sensitivity to people, excellent communication skills and a knack for diplomacy.

Knowing the importance of Project Managers, the Joint Education Committee of the Mechanical Contractors Association of Metropolitan Washington (MCAMW) and the Washington, D.C. Chapter of the National Electrical Contractors Association (NECA) want to ensure that there exists quality training for project managers within our industry. Based on the overwhelmingly positive responses by previous attendees and the continuing demand for Project Management Training, the Committee is proud to support our industry by its sponsorship of this year's Project Management Training Program.

Thomas L Bello
Executive Vice President
Mechanical Contractors Association of
Metropolitan Washington
