

RXR is an innovative investor, developer and place-maker committed to applying a customer and community-centered approach to building properties, services, and products that create enduring value for all stakeholders. Headquartered in New York with a national platform strategy, RXR is a 450+ person, vertically integrated operating, and development company with expertise in a wide array of value creation activities, including ground up real estate, infrastructure and industrial development, uncovering value in underperforming properties, repurposing well-located iconic properties, incorporating cutting edge technologies and value-added lending. The RXR platform manages 93 commercial real estate properties and investments with an aggregate gross asset value of approximately \$19 billion, comprising approximately 30.0 million square feet of commercial properties, a multi-family residential portfolio of approximately 9,000 units under operation or development, and control of development rights for an additional approximately 3,400 multi-family and for sale units as of September 30, 2023. Gross asset value compiled by RXR in accordance with company fair value measurement policy and is comprised of capital invested by RXR and its partners, as well as leverage.

Be at the forefront of shaping the future of real estate for the 21st century. Come join our team!

RXR is currently looking for a **Software Engineer (NYC)**

SUMMARY:

As a Software Engineer, you will help shape and implement architectural vision for the team. You value simplicity and are unafraid to challenge technical constraints and procedures to build the right solution. You work closely with all team members to create a modular, scalable solution that accounts for future architectural changes and designs. You work in close partnership with the Product Owner to create and align the roadmap with an eye towards future vision of the tech stack. We follow the Agile development methodology and consider ourselves to be in the driver's seat of rethinking and shaping the future of real estate. If this sounds exciting to you, we want to get to know you!

PRINCIPLE RESPONSIBILITIES:

- Help design and build a best-in-class technological product architecture with the help of the team, in a flexible manner and shape it towards emerging business needs
- Develop and maintain the full technology stack for RXR projects, from data engineering technologies to mobile app deployment
- Be a thought partner to the Product Team, bringing creative solutions to build the best product, translating technology decisions into business terms, and enable business impact and user focused prioritization
- Collaborate with and challenge the engineering and product teams to meet business needs and standards of quality.

IDEAL EXPERIENCE/EDUCATION:

- Someone with insight into newest technologies and trends and opinions on when/where they are most effective
- A degree in computer science or similar with a strong understanding of coding fundamentals, common algorithms and data structures, databases, and familiarity working in asynchronous execution environments.
- JavaScript master across the stack working with front end frameworks and microservice backends.
- Experience owning a project, personal or professional, from cradle to grave
- A hands-on developer with experience in contemporary web technologies, mobile application frameworks, and several programming languages
- Familiarity with systems architecture using cloud hosting services (serverless and microservice experience a plus)
- A strong communicator, with ability to align the organization on complex technical decisions, even when non-technical stakeholders are involved
- 0-3 years relevant professional work experience

RXR Realty is an Equal Opportunity Employer committed to recruiting, hiring and promoting qualified people of all backgrounds regardless of gender, race, color, creed, national origin, religion, age, marital status, pregnancy, physical or mental disability, sexual orientation, gender identity, military or veteran status, or any other basis protected by federal, state, or local law
