## Consequence Management Principles Program

### Empowering Leadership in Crisis

The **Consequence Management Principles (CMP)** Program is a comprehensive initiative designed to enhance leadership capabilities in navigating the complexities of major crisis events. The program aims to equip individuals with the necessary skills to effectively manage various aspects of crises, including social, political, economic, infrastructure and human factors.

The program is accelerated and through the core modules and interactive sessions, participants are guided in understanding their roles, enhancing decision-making abilities, fostering collaborative leadership, and developing effective emergency management strategies that inform the wider consequence of decision-making.
