iComply
Powered by **SafeComs**

iComply, the all-in-one solution to simplify your PDPA procedures and make sure you're in good standing.

Find out more about our **4 modules**
available separately or in packs

GAP Assessment

We assess the current state of data protection, identify critical roles, analyse gaps with the PDPA and provide an assessment report.

1

Compliance Strategy

We develop an action plan, map data flows, create governance documents and establish a risk management framework to achieve compliance.

2

Operational implementation

We implement policies and procedures, train employees, manage access requests, carry out DPIAs and keep a register of data breaches.

3

Ongoing optimisation

We ensure ongoing compliance through regular assessments, compliance and audit reports, and continuous improvements to processes and policies.

4

Why choose us?

Streamlined Processes
Simplify complex compliance requirements with automated features that save time and reduce errors.

Enhanced Security
Protect sensitive information with robust security measures tailored to your organization's needs.

Comprehensive Reporting
Generate detailed reports that provide insights and evidence of compliance for internal audits and regulatory inspections.

User-Friendly Interface
Navigate easily through a well-designed interface that ensures a seamless user experience for all levels of technical skill.

Personal Data Protection Act

Personal Data Protection

The PDPA aims to protect individuals' personal data by regulating the collection, use, and disclosure of such data. It defines personal data as any information that can directly or indirectly identify a person.

Consent and Individuals' Rights

The law requires businesses to obtain explicit consent from individuals before processing their personal data. Individuals have the right to access their data, correct it, object to certain processing, and request the deletion of their data.

Security Measures and Penalties

Businesses must implement appropriate security measures to protect personal data and inform individuals in case of a data breach. Non-compliance with the PDPA can result in financial penalties and imprisonment for those responsible.

with iComply

Efficiency and speed

iComply process privacy data quickly and accurately, reducing the time needed for compliance tasks covering the full spectrum of PDPA requirements.

Human error avoided

Data Controllers and processors can make mistakes under pressure. iComply follow standardised rules, minimising errors and logs all modifications.

Automatic updates

iComply update automatically with new regulations, whereas the company has to monitor and adapt to changes.

Constant availability

iComply operate 24/7, ensuring continuous monitoring, collecting and delivery requests as they are needed.

Comprehensive and easy to use

iComply monitor as requirements from the PDPA with a clear interface and a comprehensive user guide.
