Electric Cooperatives of Arkansas

- Created in 2014 by the Electric Cooperatives of Arkansas.
- TPI encompasses a wide variety of services:

Solar Generation

EV Charging

Battery Energy Storage

Operations & Maintenance

TPI's current footprint

Ozark Solar Park

Net Metering Customers:

City of Lincoln, City of Springdale, Elkins School District, Lincoln School District, Ozarks Go

2.7 Megawatts of Solar

7 Megawatts of Energy Storage

The solar park is estimated to save the participating entities more than \$3 million over 20 years

General dynamics/Ouachita Electric

Two 1.2 MW systems

Together, these sites are projected to produce approximately 91 million kWh over the next 25 years, offsetting the company's carbon footprint by 64,341 metric tons.

Delta Farms/Southland Gin/Craighead Electric

First agricultural energy project in Arkansas combining two different solar technologies (fixed-tilt & single-axis tracking) plus battery energy storage.

- Delta Farms annual generation 1,761,000 kWh
- Estimated savings for Delta farms is \$2 million over 25 years.

- Southland Gin annual generation 1,420,000 kWh
- Estimated savings for Southland Gin is \$1.8 million over 25 years

2 MW of Solar / 6 megawatt-hours of Battery Storage
