CIMA Diploma in Performance Management

Update from the Association:

As of 1st January 2017, The Chartered Institute of Management Accountants and The American Institute of CPAs (AICPA) joined forces to create The Association of International Certified Professional Accountants (also known as The Association) to advance the entire accounting profession, while preserving the AICPA and CIMA membership bodies. We are now collaboratively driving a dynamic profession that powers trust, opportunity and prosperity for people, businesses, and economies worldwide.

INTRODUCTION

Core Areas of Business Activities

CIMA, the Chartered Institute of Management Accountants, is the world's leading and largest professional body of management accountants. It offers an internationally recognised professional qualification in management accountancy which focuses on accounting for business.

As an organisation we are committed to constant improvement, and our reputation as a professional body has never been stronger. We are increasingly the first choice for students and employers.

CIMA upholds high ethical and professional standards to maintain public confidence in management accountancy. Our members and students must adhere to CIMA's ethical guidelines, byelaws and regulations. All CIMA's governance activities - overseen by the Council and its committees - underpin the commitment to maintain the professional standards and competence of our members and students.

CIMA has formed a joint venture with the American Institute of CPAs (AICPA) to establish the Chartered Global Management Accountant (CGMA) designation. CGMA is the global quality standard that further elevates the profession of management accounting.

What We do

CIMA is the voice of over 218,000 students and members in 177 countries. It is responsible for the education and training of management accountants who work in industry, commerce, not-for-profit and public sector organisations.

Qualifying Management Accountants

CIMA works with some of the world's leading employers and course providers around the world to educate, train and qualify first-class financial managers. We pride ourselves on the commercial relevance of our syllabus which is regularly updated to reflect the latest business developments and employer needs. This means CIMA graduates are in demand by all forward looking businesses.

Supporting Our Members

We offer valuable guidance, support, information and training to our members – at every stage of their careers. And because CIMA members are in touch with the latest industry developments, they are ideally qualified to lead the finance function in any organisation.

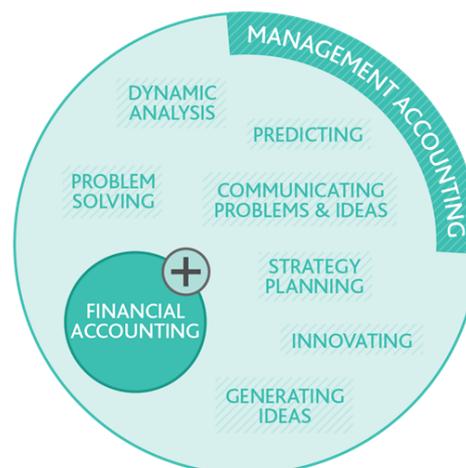

Upholding High Professional Standards

It has never been more important for accountants to demonstrate total integrity. CIMA plays an essential role in protecting the public interest by regulating its members and contributing to the ongoing development of the profession through technical research and development.

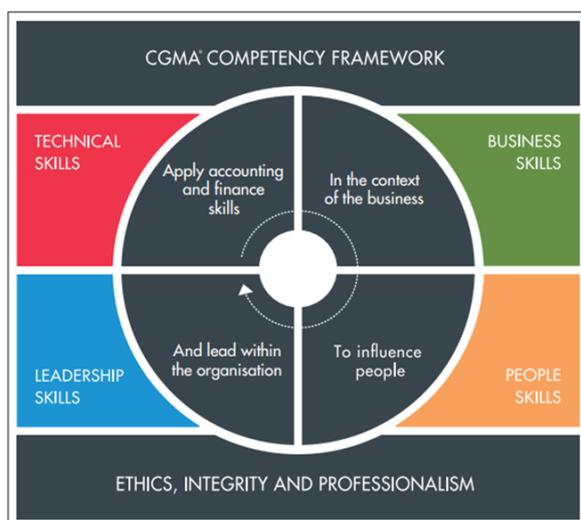

Values of Management Accountants

CIMA Members are highly valued in business because they can:

- Guide critical business decisions
- Provide valuable strategic advices
- Combine financial expertise and business
- Knowledge to create growth
- Provide strong leadership and managerial skills
- Successfully manage risk

Competency Framework

The CGMA Competency Framework is very much the **engine of change** that has helped us to understand the knowledge and skills the business world needs from business and finance professionals.

This framework becomes a powerful tool for members to **identify gaps** in their technical, business, personal, and leadership skills in requirement of membership.

CIMA DIPLOMA IN PERFORMANCE MANAGEMENT WORKSHOP

CIMA Diploma in Performance Management helps professionals from all background to learn how Management Accounting can help support crucial decision making in all business functions.

On the other hand, cybersecurity has become an important issue for every organisation in today’s digitally connected world. Awareness and understanding of the risks and appropriate responses are critical for everyone from the board of directors to the entry-level employees.

Through this 2-day workshop, participants will learn how to combine financial and non-financial data to paint a complete picture of the business then use that to drive business success. Participants will also be provided with the basis of that understanding, along with important considerations for insuring that risk, for improving security, and for formulating a description of the entity’s cybersecurity risk management program that can be used as criteria for an assurance examination.

The main highlights of this workshop will be on:

Day 1:	<p><u>Management Accounting:</u></p> <ul style="list-style-type: none"> • Cost accounting system • Budgeting • Short-term decision making • Dealing with risk and uncertainty
Day 2:	<p><u>Advanced Management Accounting:</u></p> <ul style="list-style-type: none"> • Cost planning and analysis for competitive advantage • Control and performance management of responsibility centres • Long-term decision making • Management control and risk • Cybersecurity risk management
