5. Workshop overview

The purpose of the initiative is to explore how good reporting – that is aligned to the UN Guiding Principles on Business and Human Rights – can be a catalyst for better human rights performance. The UN Guiding Principles Reporting Framework was developed to specifically achieve that aim, by asking companies to focus their disclosure on the most severe (or salient) human rights facing them, and to explain how they are managing those risks, or remedying issues that have occurred, through a series of open-ended questions that require the contextual and qualitative information that disclosure on risks to people require.

This workshop is one component of a 3-year initiative funded by the UK Department for International Development aimed at enhancing human rights disclosure.
