

2019 ASIA Plastics Processing Technology & Innovative Materials Summit

MAKING THE ASEAN PLASTICS BUSINESS CONNECTION

August 29-30, Jakarta, Indonesia, JS Luwansa Hotel and Convention Center

Key Practical Highlight of the Summit:

- Insights on best-practices and latest innovative technologies in target sector: PACKAGING and AUTOMOTIVE
- Optimized process and cost reduction solutions
- A road map for the future of innovative plastics

Southeast Asia: Rising star in global plastics industry

“Southeast Asia serves both as a great growth market, a place to offshore thanks to lower costs of production and liberalization of trade, as well as a source of mitigation from geopolitical risks”- Trinh Nguyen, a senior economist at Natixis Asia Ltd.

Indonesia poses high demand for innovative technologies and plastic materials

There is doubt that Southeast Asia now plays an all-important role in the global plastics industry, with a plastics market that is projected to grow by more than 5% yearly. Indonesia, aside from being the largest economy, has a dynamic manufacturing sector that now ranks the highest in the region. The country's plastics industry alone is expected to grow by about 6% annually up to year 2023. This tremendous growth potential poses strong demand for highly advanced technologies and performance materials.

Breakthrough technologies are finding their way into Indonesia's dynamic sectors. Automation, artificial intelligence (AI), IoT, digitalization and smart manufacturing are fast gaining acceptance in Indonesia where manufacturers recognize that they need to adopt these latest trends to see a better future in the global arena. In the same way, high performance plastic materials are witnessing the fastest growth in demand owing to the significant rise in the requirements of plastics-dependent sectors.

Packaging dominates

The packaging industry in Southeast Asia dominates the region's manufacturing sector. Despite the many challenges posed by concerns on the environmental impact of plastics, packaging remains the biggest application segment in Indonesia's plastics industry with 130 billion units projected by 2021, growing annually by 5%. Faster economic growth fuelling expanding consumer spending has created substantial demand for packaged products, especially in the food and beverage sector. Rigid plastics as well as flexible packages are among the biggest market gainers, with flexible packaging accounting for 42% of the market share, while rigid plastics' share reaches 25%. Packaging for food and beverages are becoming lighter and stronger, while preference turns toward convenience and environment-friendly packaging.

Automotive gears up demand

As the powerhouse in the global market, the Southeast Asian automotive industry is attracting huge investment inflows. Indonesia's automotive industry is growing rapidly and is now a major contributor to the country's economic performance. Production of 4-wheeled vehicles have breached the 1.2 million units, while export of automotive components has risen more than 10 times to over 80 million annually. With target production of 1.5 million units by 2020, demand for high-tech production technologies and engineering plastics are on the upswing. Moreover, with the government's current drive to promote the production of electric cars and electric motorcycles, many other sectors are expected to accelerate their development, such as the battery and automotive parts production.

Get Involved. Make Connection.

The Asia Plastics Processing Technology and Innovative Materials Summit 2019 (Asia Plastics Summit 2019) in Jakarta, Indonesia is the third edition of the highly successful Summit held every year. The 2-day event is packed with informative presentations and discussions focusing on innovative technologies and high-performance materials as applied in fast-growing sectors such as Packaging and Automotive. With positive feedback from the past delegates and resource persons that this event is an ideal venue in Asia where industry professionals can exchange ideas and expand their network and contacts, don't miss this chance!

Aside from the technical presentations, lunches, receptions and cocktails are organized for delegates and industry experts to facilitate networking and meet their potential business partners and clients.

Be with the Who's Who of the plastics manufacturing industry in Southeast Asia. Meet and talk with the experts, not only from Asia, but also from Europe and North America. Listen and learn from high-powered keynote addresses and engage in lively talks and panel discussions.

Title

Event Highlight

Main Themes:

Next-Generation Technologies and Materials Solutions for the Fast-Growing Sectors

1. Industry performance, market trends, government regulation and standards
2. Innovative processing techniques and design tools and their impact on product quality
3. High-tech materials and their applications in select sectors
4. Recent trends in industrial productions – Industry 4.0, automation and sustainable production

Key Topics

Plenary Sessions

- ♦ Overview of the Southeast Asian plastics market - growth, trends and forecast.
- ♦ Indonesia: Industrial sector growth and how it impacts plastics demand.
- ♦ Recycling systems and the circular economy.
- ♦ The New Plastics Economy: global commitment and targets.
- ♦ Smart production cells - tomorrow's production set-up through automation.
- ♦ Road map towards the implementation of IoT in plastic industry.
- ♦ Maximizing the benefits of auxiliary equipment .
- ♦ Processing efficiencies through all-electric injection molding.
- ♦ Advanced inspections/monitoring systems and their impact on final product

Focused track: Packaging

- Packaging industry in Indonesia - consumer preferences and future market direction.
- Advanced blown film extrusion process for flexible packaging.
- Breakthrough all-electric stretch blow molding technology.
- Thermoforming techniques for food & beverage packaging.
- Advances in biobased plastics for food contact packaging.
- Creating sustainability through green material.
- Packaging waste management.

Focused track: Automotive

- Injection overmolding in automotive.
- Sustainable plastic materials in automotive production.
- Flame-retardant solutions for PU foams in automotive.
- Automotive Plastics Applications: Developments in coatings.
- Autoparts manufacturing trends: designing tomorrow's cars.
- Electric vehicles production in Indonesia - roadmap and opportunities.
- EV battery sector growth and prospects.

Who Will Attend?

The Asia Plastics Summit is the "Must Attend" event for decision makers from plastics industry in Indonesia and ASEAN.

BY Industry:

- Plastics Material Suppliers
- (Compounders, Masterbatches)
- Mold Makers
- Plastics Processors
- OEM Production Manufacturers
- Packaging, Automotive and Consumer Electronics Construction / Infrastructure Manufacturers
- Plastics Processing and Testing Equipment Suppliers
- Industry Associations, Research Institutions, Universities and Research Organizations

By Position

- President / Vice-president / Chief Executive Officer / General Manager
- Manufacturing Director
- R&D Heads / Planning Director / Manager / Design Engineers
- Production / Process / Project Director / Managers
- QC Director / Managers
- Purchasing Director / Managers
- Marketing & Sales Director / Managers / Representatives
- Market Analysts, Government Policy Makers

Strong partners

3 key associations from Indonesia & S.E Asia will support our event and their members are invited to attend this event for deeper partnership.

§ **INDONESIAN PACKAGING FEDERATION (IPF)**

IPF is a business association, nonprofit, non-governmental organization of packaging industry in Indonesia, founded in August 1977. The mission is to enhance packaging quality & technology development as well as to encourage research and development in the packaging innovations.

§ **Indonesia Plastic Recycling Association (ADUPI)**

Indonesia Plastic Recycling Association (ADUPI), established in 2015 in Surabaya, East Java (previously existed as ADUPI) was founded by plastic recycler entrepreneur.

ADUPI has 300 Members, including 120 members of finish good manufacturer & pelletizing processor and 145 members of flakes & chips producer, waste bank, and scavenger.

§ **Indonesian Plastics Recyclers (IPR)**

IPR's vision is to contribute to the sustainability of environment by driving the shift towards Circular Economy Model through the development of Plastics Recycling in Indonesia to reach the mission of improving Indonesian plastics recycling by creating synergy between government and businesses and striving for the increase of Recycling Rate of plastics in Indonesia. Member profile includes equipment and machinery providers, supporting raw material producers, consulting service providers, etc.

ABOUT RINGIER

Taking advantage of powerful media resources, Ringier Conference covers the industries of plastics, food, personal care, medicine & health care, nonwovens, coatings & ink, automobile, metal, mold & die, package, composite material, and the latest technologies. Since 2003, we organize over 20 high level conferences bringing industry leaders together for information exchange and networking opportunities in China and successfully extend into S.E. Asia from 2014.

A series of conferences in S.E. Asia that cater specifically to industry verticals like metalworking technology, plastics processing, automotive, food beverage processing & packaging representing growth sectors in many S.E. Asia countries. These sectors require high levels of technology and upgrading to meet the growing needs of sophisticated consumers both domestically and for export markets.

Conferences organized by Ringier not only provide industry leaders with the latest technologies, but also help Greater China enterprises innovatively explore new markets. For more information, please visit www.ringierevents.com
