Software Developer

We have been on the Inc. 5000 list of fastest growing companies in the United States for the past 10 years running, were selected in 2019 as a Virginia Chamber of Commerce Fantastic 50 company and a NVTC Tech 100, and are a certified Great Place to Work!

Every bit of our success is the result of a team of incredibly talented, dedicated, and focused professionals who are the heart and soul of Harmonia! We offer competitive compensation and a dynamic, productive work environment. Benefits include employer-paid medical, dental, vision, and life insurance options; gym/wellness reimbursement; 401(k) matching; 501(c)(3) donation matching; paid holidays; generous paid time off; training reimbursement; and an Employee Assistance Program.

We have an exciting opportunity for multiple Senior-level and Mid-level Software Developers to work as part of our team on innovative and interesting software development projects. This position may sit in either Charlottesville, Blacksburg, McLean, or San Diego, depending on candidate preference.

The ideal candidate will:
• Participate in research, design, and implementation of solutions for challenging computer science problems and bleeding edge technologies.
• Participate in product design and planning.
• Maintain high levels of knowledge, skill, and competencies in software development for an extensive range of project types/technologies.
• Translate design requirements and specifications into successful implementations.
• Create design and deployment documentation.
• Work in a team environment and share knowledge.
• Proactively enforce standards and best practices.
Requirements

Mid-Level: 3+ years of professional experience as a software engineer/developer using Java, Python or other technologies.
• Experience developing Web-based applications and web services.
• Experience in relational and/or non-relational databases such as SQL or MongDB.
• Experience with any of the following technologies: VueJS, Maven, AJAX, Kafka/AMQP, SOA, PKI.
• Experience with Source Control Management systems, such as GIT (preferred) or SVN.
• Experience with continuous integration software build schemes.
• Experience in the following a plus: Microservices, Web Services, OpenShift, Docker.
• Understanding of Unit Testing and associated frameworks, e.g. JUnit.
• Experience working in an Agile software development environment.
• Ability to work well and collaborate with peers in a team-oriented environment with minimal supervision.
• 4-year college degree in Computer Science or related field.
• Prior experience working with federal government clients, such as DoD preferred.
• DoD Secret level clearance a plus.
• US Citizenship is required
