

Preparing Graduates for the AI Era: Approaches to teaching and assessment for student success in an uncertain world

3 May 2024 | Heriot-Watt University Malaysia | In-person and online
15:00 - 17:00 (MYT)

Aims

The workshop will explore approaches to teaching and assessment that will prepare graduates for an AI-enabled workplace.

The workshop

Artificial Intelligence (AI) is changing the way we work and learn. Higher education providers will play an important role in preparing people for future employment by supporting them to develop the skills and knowledge necessary to work with, and make responsible use of, AI.

This highly interactive session designed for Senior Fellows or aspiring Senior Fellows will invite discussion on the purpose of higher education and what attributes graduates will need to be successful in an AI driven workplace. This will lead to a discussion on the extent to which we need to integrate AI into learning, teaching and assessment to provide authentic experiential learning.

Facilitator: [Dr Kay Hack, Advance HE](#)

Guest Speaker: [Dr Jay Wasim, Heriot Watt University](#)

Outcomes

At the end of the workshop, participants will have:

- + Reflected on their personal and their institution's approach to generative AI
- + Explored the benefits and challenges of generative AI tools to support learning, teaching and assessment
- + Discussed the teaching and assessment practices that will help students develop distinctively human capabilities
- + Reviewed their learning outcomes and how they might need to be adapted to prepare students for learning and working with AI
- + Reflected on how they can lead and support colleagues to adapt their practice.

Why join this workshop

This workshop will provide you with the opportunity to join Senior Fellows from the HE sector in Malaysia and Singapore to discuss the impact of generative AI on higher education: assessment methods, how students learn, and how and what is taught.
