Luther is offering complimentary BOI Audit for GTCC Members

After obtaining a promotion certificate from the Board of Investment (BOI), a promoted company must comply with several requirements, for example:

Project progress report

Submit a project progress report to the BOI in February and July every year via BOI's e-monitoring online system.

Promotion report

Before utilising a granted incentive, the promoted company must apply with the BOI, e.g., for foreign expert privileges via the BOI's e-expert system or for tax privileges via the BOI's e-tax system.

Annual report

Submit the financial status and project operation results once a year.

BOI operating license

Apply for a BOI operating license within 36 months from issuance of the BOI promotion certificate.

Depending on the type of business activities and promotion category as well as the terms and conditions of the BOI promotion certificate, additional compliance requirements may apply.

BOI compliance is substantial for keeping the certificate and the company operating. We are pleased to offer Members of the GTCC a **complimentary BOI Audit**. Our assessment makes sure that your business has no loose ends when it comes to statutory requirements. You will receive an actionable and detailed status report addressing applicable obligations.

Applicable to BOI companies, sign up by contacting us via thailand@luther-services.com before 30 September 2022.
